CARDIOVASCULAR DEVICE

Experts. Experience. Execution.

Discover the **POWER OF X**[®]

Medpace Medical Device

Medpace is dedicated to helping our clients bring medical device and diagnostics products to market safely and efficiently.

Our experience spans:

- Pre-market, post-approval and post-market studies
- National, regional and global device and diagnostics trials
- Single-center, first-in-human, and feasibility trials to multi-center, full-service pivotal trials as well as large-scale, post-market outcomes studies

Global Advantage

- Offices in U.S. and Europe
- European office is ISO-9001 certified
- European authorized representative services
- Geographically diverse and multilingual employees understand local cultural environment and regulatory pathway

For more information about our medical device and diagnostics experience and services, visit our website at www.medpace.com/device, email us at info.mmd@medpace.com or contact us at one of our medical device offices below.

Industry Leader in Cardiovascular Device and Diagnostics Studies

Medpace Medical Device (MMD), a full-service division of Medpace, is an industry leader in cardiovascular studies and has conducted more than 130 cardiovascular trials involving nearly 42,000 patients enrolled across more than 2,600 sites.

Among these 130 trials, MMD has developed a comprehensive portfolio involving devices in nearly every cardiac specialty. Our team's broad cardiac expertise affords MMD a competitive edge in managing cardiac clinical trials and a familiarity with the regulatory, operational, and safety considerations needed to successfully conduct these trials with a high degree of quality.

Our cardiovascular device experience spans:

- Valvular Disease
 - Aortic valve replacement (transcatheter and surgical)
 - Mitral valve repair (transcatheter and surgical)
- Coronary Artery Disease (interventional)
- Heart Failure
 - Ventricular assist devices
 - Chronic resynchronization therapy
 - Autonomic stimulation
- Electrophysiology
 - Pacemakers/Implantable cardioverter defibrillators
 - Ablation catheters
 - Mapping systems
- Cardiac Surgery
 - Coronary bypass grafts
 - Vessel occluders
- Congenital Heart Disease
- Endovascular/Interventional
 - Peripheral vascular disease
 - Carotid artery disease
 - Thrombectomy/Embolic protection
 - Aortic aneurysm

Therapeutic Leadership

Our board-certified cardiologists, with backgrounds in academic clinical practice and pharmaceutical development, understand the unique nature of cardiac device trials. They provide strategic direction for study design and planning, train operational staff, work with primary investigators, provide medical monitoring, and meet with regulatory agencies.

Integrated Services to Maximize Efficiencies

To ensure seamless logistics, review and testing, MMD provides global, integrated imaging, centralized ECG management and central laboratory services.

Medical Device and Diagnostics Services

Medpace provides pre-market, post-approval and post-market device trial management, including regulatory development, planning and submission support.

Comprehensive Clinical Services

Clinical strategy development

Trial design including:

- Protocol
- Patient Consent
- Patient Information
- Investigator Brochure
- CRF
- Statistical

Trial management

- Clinical team management
- IRB/Ethics Committee submission
- Competent authority submission/notification
- Metrics and reporting
- CEC/DSMB management
- Episode adjudication

Site selection and qualification

Monitoring

- Site initiation
- Close out services

Data management

- Database development
- Data review and query management

Safety and risk management

- Safety and vigilance reporting
- Event management

Study report preparation

- Medical writing
- Data analysis

Device distribution services
