

Do you have high triglyceride levels?

If so, consider enrolling in the K-877-ER-201 study.

K-877-ER-201 is a clinical research study investigating a study drug that may lower the amount of fat cells (triglycerides) in the blood.

Key qualification requirements:

- At least 18 years old
- High triglyceride levels
- If taking a statin, ezetimibe, or PCSK9 inhibitors, you must be on a stable dose

Note: Other requirements apply

Qualified participants will receive at no cost:

- Access to an investigational drug
- Study-related support and monitoring by a healthcare team
- Education about managing triglyceride levels
