PERSONAL CARE TESTING UNIT

Experts. Experience. Execution.

Discover the **POWER OF X™**

Medpace Beauty and Skin Care Facility is Specifically Designed for Your Needs

The Medpace Personal Care Testing Unit (PCTU) was specifically engineered for conducting personal care product trials including but not limited to facial fine line and wrinkle, skin imaging, antiperspirant efficacy, shampoo and hair color, and punch biopsy studies. Medpace, long known for operational excellence in clinical development, is your first choice for personal care projects because Medpace's PCTU has access to CRO resources and medical physician oversight. Medpace PCTU has two environmentally controlled rooms, a hair test salon, leg wash room and an imaging room to fully service your personal care study needs.

Environmentally Controlled Spaces

The PCTU offers two separate environmentally controlled rooms with programmable temperature and humidity settings (temperature 65°-102°F, relative humidity RH 30%-50%). Additional room features include an central touch screen control panel, retrievable time-stamped data, system alerts for out of range values, internet/hardwire options, TV, restroom, master clocks and multiple outlets. The control panel resides in the room for easy access to set and monitor room conditions. The rooms can be used separately, or in combination as acclimation/procedure rooms.

Multipurpose Washroom

The multipurpose washroom contains curved granite sinks with LED lighted vanity make up mirrors for face washing and product application. Features include large wash basins with secure, adjustable chairs and a high-capacity hot water heater for LCAT/FCAT controlled application procedures. The hair test salon offers comfortable chairs and sinks for shampoo/conditioner and hair color product evaluation.

Imaging Room

Complete with a floor to ceiling dark room and adjustable lighting, the PCTU large imaging room is perfect for image analysis and photography.
