

THE MEDPACE ADVANTAGE TO CONNECTED DEVICES: FROM CONCEPT TO REALITY

Amassed aggregate health data from connected devices can confirm trial safety and can also be leveraged to evaluate the effectiveness of a medical therapy or drug, while delivering many other vital operational and analytical advantages

As a full-service CRO offering comprehensive support for clinical trials, Medpace can help Sponsors seamlessly incorporate remote biosensors into their research. From selecting and deploying the right sensors to meet endpoints, to ensuring compliance and engagement, to transforming data to support regulatory review, Medpace has the expertise to reach your goals.

SELECTION OF TRIAL-SPECIFIC VALIDATED SENSORS

MANAGING LOGISTICS AND AVAILABILITY TO SITES

SECURE DATA CAPTURE AND STORAGE

INTEGRATION INTO CLINICAL STUDY RECORDS

REVIEW, ANALYSIS, HARMONIZATION, AND VISUALIZATION OF TRIAL DATA

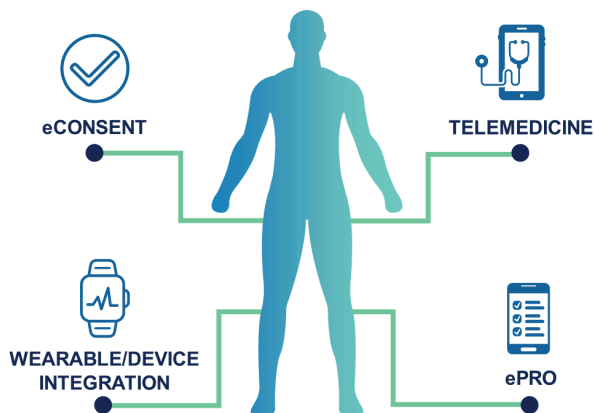

TRANSFORMING DATA TO SUPPORT REGULATORY REVIEW

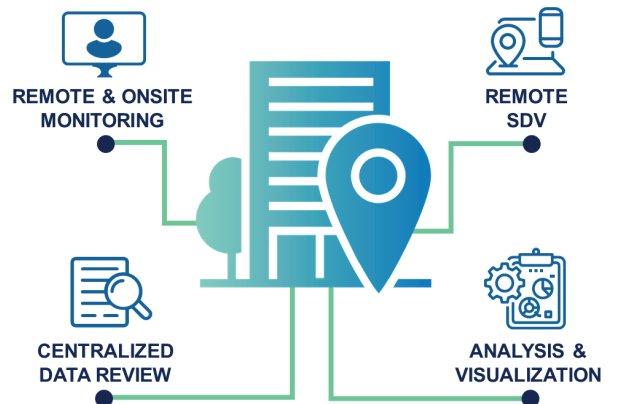

BEYOND CONNECTED DEVICES

Connected devices is just one way we enable decentralized and hybrid clinical studies. Understanding the capabilities of a site and providing the tools, technology, and communication to support them is crucial.
