

ACCELERATING CLINICAL DEVELOPMENT THROUGH DECENTRALIZED CLINICAL TRIAL CAPABILITIES

MAKING THE COMPLEX SEAMLESS® WITH TAILORED DCT SOLUTIONS

Clinical development continues to become increasingly complex – each study contains its own unique set of challenges and nuances. Rather than a "one size fits all" approach, Medpace offers Sponsors customized programs designed to achieve your study's objectives and timelines. As part of this tailored approach, Medpace offers a suite of decentralized clinical trial (DCT) capabilities that provide additional tools to help keep studies on track and on budget, while providing greater flexibility and support for sponsors, sites and patients.

Through our proprietary technology suite, deep operational experience and know-how, and key partnerships, the team at Medpace can incorporate the right elements of decentralized/hybrid trials to tailor a best-fit trial design to your program's objectives and position your trial for success

ADVANTAGES OF MEDPACE DCT OFFERINGS

NEARLY ALL CURRENT MEDPACE-LED STUDIES UTILIZE ASPECTS OF OUR DCT SERVICE OFFERINGS

SPONSOR BENEFITS:

- Expanded and expedited patient recruitment
- Enhanced patient retention
- Enhanced timeliness of data collection and improved oversight of patient safety and data integrity
- Improved compliance

PATIENT BENEFITS:

- Reduced patient burden
- Reduced travel for site visits
- Increased engagement with trial

SITE BENEFITS:

- Reduced administrative burden
- Enhanced reporting and support
- Enhanced timeliness of patient/site interactions

WE CAN'T SIMPLIFY CLINICAL DEVELOPMENT - BUT WE CAN EXECUTE IT SEAMLESSLY
