

WOMEN'S HEALTH CLINICAL DEVELOPMENT

Clinical research focused on Women's Health has garnered significant attention from the pharmaceutical research and drug development industries in recent years. Despite this increased attention, Women's Health clinical development remains uniquely complex, facing hurdles such as steep competition for site resources, patient recruitment challenges, and insufficient cross-therapeutic expertise.

IMPROVING HEALTHCARE FOR WOMEN ACROSS THE GLOBE

At Medpace, we have a therapeutically aligned leadership team focused specifically on improving the execution and efficiency of Women's Health clinical research in a number of diverse disciplines. We understand not only that biological differences between men and women impact responses to pharmacologic therapies and healthcare outcomes, but also that fundamental gaps in women's healthcare currently exist.

At Medpace, we recognize the challenges unique to Women's Health clinical trial development. As such, our work is informed by our experience across a broad range of relevant therapeutic areas and indications, including but not limited to Gynecology, Urogynecology, Oncology, Infectious Diseases, Endocrinology and Metabolism. Our goal at Medpace is ultimately to fill the many unmet clinical needs in Women's Health and improve healthcare outcomes and quality of life for women across the globe.

EXPERTS

- Fully embedded medical leadership focused on Women's Health within the clinical trial process from inception to completion
- Medical experts with extensive academic, clinical, and industry experience, in addition to strong relationships with relevant key opinion leaders, experienced sites, and investigators

EXPERIENCE

- Therapeutic expertise across multiple areas relevant to Women's Health, including board-certified physicians in Gynecology, Urogynecology, Oncology, Endocrinology, and Infectious Diseases
- Operational experience in Phase I to IV Women's Health clinical trials

EXECUTION

- Full-service approach to drug development
- A fully integrated and experienced clinical operations and medical team
- Recruitment expertise in relevant patient populations, especially in difficult-to-recruit patient populations
- Wholly -owned Imaging Core Lab and Central Laboratories, providing cohesive, streamlined, and standardized trial management
- A proprietary, feature-rich, and fully customizable Clinical Trial Management System to inform decision making, drive efficiencies and keep your study on track

DIVERSE THERAPEUTIC EXPERTISE

The intersection of Women's Health and related diverse disciplines is handled through the collaboration of our medical leadership and functional areas. Medpace accelerates Women's Health development by fully embedding medical leadership and a wide array of relevant therapeutic expertise, integrated across all functional areas, into the clinical trial process. This cross-therapeutic and cross-functional area collaboration allows for optimized trial communication and execution, and ultimately, expedited timelines.

GYNECOLOGIC INDICATIONS

- Abnormal uterine bleeding
- Adenomyosis
- Benign breast disease
- Cervical dysplasia
- Contraception
- Endometriosis
- Female sexual function/dysfunction
- Infertility
- Intrauterine adhesions
- Menopause/perimenopause
- Osteoporosis
- Ovarian cysts
- Polycystic ovary syndrome
- Sexually transmitted infections
- Uterine fibroids/polyps
- Vulvar dysplasia
- Vulvovaginitis

UROGYNECOLOGIC INDICATIONS

- Fecal incontinence
- Female pelvic pain/dyspareunia
- Genitourinary syndrome of menopause
- Interstitial cystitis/bladder pain syndrome
- Overactive bladder
- Pelvic organ prolapse
- Urinary incontinence
- Urinary tract infection
- Voiding dysfunction/incomplete bladder emptying
- Vulvar disorders

WOMEN'S CANCERS INDICATIONS

- Breast cancer
- Cervical cancer
- Endometrial cancer
- Ovarian cancer
- Uterine cancer
- Vaginal cancer
- Vulvar cancer

ENDOCRINE & METABOLIC INDICATIONS

- Gestational diabetes
- Menopause
- Osteoporosis
- Polycystic ovary syndrome
- Sexual dysfunction

INFECTIOUS DISEASES & VACCINES INDICATIONS

- Bacterial Vaginosis
- Candida vulvovaginitis
- Chlamydia
- Complicated urinary tract infection
- Genital herpes simplex
- Gonorrhea
- Human papillomavirus
- Pelvic inflammatory disease
- Recurrent urinary tract infection
- Syphilis
- Trichomoniasis
- Uncomplicated urinary tract infection
- Urethritis

FULL-SERVICE CLINICAL DEVELOPMENT

Medpace is a scientifically-driven, global, full-service clinical contract research organization (CRO) providing Phase I-IV clinical development services to the biotechnology, pharmaceutical and medical device industries. Medpace's mission is to accelerate the global development of safe and effective medical therapeutics through its high-science and disciplined operating approach that leverages local regulatory and deep scientific expertise across all major therapeutic areas.
