

Certificate of Analytical Quality

Medpace Reference Laboratories

Cincinnati, Ohio

Pool Series: 724

Assessment Period: February 2024 - July 2024

The Cholesterol Reference Method Laboratory Network (CRMLN) Network laboratory, Medpace Reference Laboratories, has successfully met the stringent analytical performance criteria needed to appropriately assess the accuracy and reliability of lipid measurements, and to assist with assay calibration.

By meeting the CRMLN analytical performance criteria, the laboratory is able to provide critical and highly needed reference measurements at an appropriate level of quality. Through these measurements, the laboratory is making major contributions to ensure blood lipid measurements performed in patient care and public health are accurate and reliable worldwide.

Analytes

HDL Cholesterol by Ultracentrifugation

LDL Cholesterol by Abell-Kendall

Total Cholesterol by Abell-Kendall

Hubert W. Vesper, Ph.D.
Director, CDC Clinical Standardization Programs
